

Doha Alnabahin

Junior Data Scientist | Machine Learning | Data Analysis

+970 592 198 481 | Gaza, Palestine | sdohao415@gmail.com | [LinkedIn](#) | [GitHub](#) | <https://doha-portfolio.onrender.com>

SUMMARY

IT graduate specializing in Data Science and Machine Learning, with hands-on experience in data analysis, exploratory data analysis, predictive modeling, and deep learning. Completed a 660-hour Data Science & Machine Learning Bootcamp with practical experience using Python, Pandas, NumPy, Scikit-learn, TensorFlow, Keras, and data visualization tools. Developed end-to-end projects covering data preprocessing, feature engineering, model development, evaluation, and deployment. Seeking opportunities as a Junior Data Scientist, Data Analyst, or Machine Learning professional.

TECHNICAL SKILLS

Programming Languages

Python · SQL · Pandas · NumPy

Data Science & ML

Scikit-Learn · TensorFlow · Keras · SMOTE

ML Models

Random Forest · Logistic Regression · KNN · Decision Trees · Linear Regression · GridSearchCV

Workflow & Methodology

CRISP-DM · EDA · Feature Engineering · Model Evaluation · Data Cleaning · Imbalanced Class Handling

Tools & Platforms

Git · GitHub · Jupyter Notebook · Google Colab · VS Code

TECHNICAL PROJECTS

LoanSense AI | Machine Learning Web Application | [Github Link](#)

Built an end-to-end loan approval prediction system using Python, FastAPI, and Scikit-learn

- Developed a **KNN-based classification model** with feature engineering to predict loan approval decisions
- Implemented both **single** and **batch prediction** workflows with confidence scores through a responsive web interface
- Evaluated model performance using **Accuracy, Precision, Recall, F1-score, ROC AUC, Confusion Matrix, and ROC Curve**
- Deployed the application on **Render** and managed the project using **GitHub**

Malware Detection via Visual Intelligence | CNN Classification | [Github Link](#)

Built an end-to-end CNN system that classifies malware families from byte-level image data

- Engineered byte-frequency image features and trained a CNN reaching 83.47% accuracy across 10 classes
- Fixed a critical dataset flaw (zero benign samples) by sourcing, balancing, and retraining with real clean-file data
- Deployed a full-stack inference pipeline (FastAPI + custom frontend) with confidence-threshold logic

Chicago Crime Time Series Analysis | *Data Analyst* | [Github Link](#)

Time series analysis project to uncover crime trends in Chicago across years, districts, rush hours, and holidays

- Analyzed 7.7M+ Chicago crime records from 2001–2022 to uncover crime trends across years, districts, rush hours, and holidays
- Prepared 22 yearly CSV files into one time-indexed dataset for time series analysis
- Found a 50.84% decrease in reported crimes from 2001 to 2022
- Identified PM rush hour as the higher-crime period with 1.2M+ reported crimes
- Created professional visualizations to communicate stakeholder-focused insights

EDUCATION

Axsos Academy | *DATA SCIENCE & AI BOOTCAMP* | Remote

2026

- 660-hour Data Science & Machine Learning Bootcamp covering Data Science Fundamentals, Machine Learning, Intermediate Machine Learning, and Time Series Analysis

UNIVERSITY OF PALESTINE | *Bachelor's in Information Technology* | Gaza, Palestine

2024

- Relevant Coursework: Data Science · Machine Learning · Statistics · AI · Image Processing · Databases · Algorithms

PROFESSIONAL EXPERIENCE

FRONT END DEVELOPER (TRAINEE) | Vision Plus | Gaza, Palestine

JUL 2022 – AUG 2022

- Built 5+ responsive web templates using HTML, CSS, and JavaScript with cross-device compatibility
- Implemented interactive UI features using JavaScript to improve user engagement across all templates
- Designed mobile-first layouts ensuring usability across 3+ screen sizes

JAVA DEVELOPER (TRAINEE) | Vision Plus | Gaza, Palestine

JAN 2021 – MAR 2021

- Developed 3+ Java applications applying OOP principles, control flow, and exception handling
- Designed modular, maintainable code structures using Java SE, reducing debugging time
